

SWEET SOLUTION FOR TOUGH-TO-CONTROL WEEDS

Managing tough grass and broadleaf weeds in sugarcane fields is all about finding the balance between powerful control and crop safety. Sugarcane growers have a solution to both challenges with Caravel® Herbicide.

Caravel knocks out tough-to-control grass and broadleaf weeds in sugarcane production including barnyardgrass, goosegrass, Florida beggarweed and tropic croton. Additionally, the crop safety of Caravel lets you use lower rates for relatively easy-to-manage weeds or increased rates for the toughest weed challenges. Caravel can also be used pre-emergence, so that you don't lose yield due to early-emerged weeds.

Broad-spectrum control, application flexibility, crop safety and priced with your bottom line in mind, Caravel is the sweet solution for sugarcane growers.

CARAVEL OVERVIEW

Active Ingredient: Clomazone
Class Code: I3

- » Broad-spectrum residual control of key grass and broadleaf weeds in sugarcane production
- » Controls yield-robbing weeds prior to their emergence—saving you money
- » Features micro-encapsulation formula to help keep the product where you put it

RECOMMENDED USE RATES

42.7 fl. oz./A (1.0 lb. a.i./A) to
53.5 fl. oz./A (1.25 lb. a.i./A)

» Pre-emergence per label instructions

PACKAGING

2 x 2.5 gallons per case,
265 gallon tote

DISEASES CONTROLLED

GRASSES

42.7 fl. oz./A (1.0 lb. a.i./A)

- » Barnyardgrass
- » Broadleaf signalgrass
- » Crabgrass
 - Large
 - Smooth
- » Cupgrass
 - Southwestern
 - Woolly
- » Field Sandbur
- » Foxtail
 - Giant
 - Green
- » Goosegrass
- » Itchgrass²
- » Panicum
 - Common
 - Fall
 - Texas
- » Red Rice*
- » Seedling johnsongrass

53.5 fl. oz./A (1.25 lb. a.i./A)

- All grasses controlled at 42.7 fl. oz./A plus:
- » Barnyardgrass¹
 - » Foxtail
 - Purple
 - Robust
 - Yellow
 - » Junglerice*
 - » Shattercane*
 - » Wild Proso Millet*

BROADLEAVES

42.7 fl. oz./A (1.0 lb. a.i./A)

- » Velvetleaf
- » Spurred anoda
- » Cocklebur
- » Common ragweed
- » Dayflower
- » Florida beggarweed
- » Jimsonweed
- » Kochia*
- » Lambsquarter
- » Prickly sida
- » Purslane
- » Redvine*
- » Redweed
- » Tropic croton
- » Venice mallow
- » Wild poinsettia
- » Pennsylvania smartweed*

53.5 fl. oz./A (1.25 lb. a.i./A)

- All broadleaves controlled at 42.7 fl. oz./A plus:
- » Balloonvine*
 - » Black nightshade*
 - » Curly dock
 - » Joint Vetch*
 - » Kochia
 - » Morningglory
 - Pitted
 - » Pennsylvania smartweed
 - » Pigweed
 - Redroot*
 - Smooth*

* Partially controlled.

¹ For suppression, Caravel herbicide at 53.3 fluid ounces (1.25 lb. a.i./A) applied immediately after planted sugarcane in late summer and early fall has been effective in delaying Bermudagrass reestablishment.

² For control of itchgrass, do not incorporate Caravel herbicide. For heavy weed population and heavy soils, use 53.3 fluid ounces (1.25 lb. a.i./A).
