

CLAY GRANULE HERBICIDE EXCLUSIVELY FOR CALIFORNIA GROWERS

WEED CONTROL THAT WORKS, WHEN YOU NEED IT THE MOST

Unleash your rice crops from destructive weeds with CARAVEL 5G, a powerful herbicide formulated by Sipcam Agro USA. Utilizing a microencapsulated form of clomazone, CARAVEL 5G effectively targets both grass and broadleaf weeds. This product has been specifically developed to cater to the unique needs of California rice growers and industry leaders as a whole. With its proven crop safety and exceptional herbicidal efficacy, CARAVEL 5G is tailor-made for your farm, providing the ultimate solution for weed control in rice cultivation.

Its clay granule formulation provides extended residual activity, reducing weed pressure and saving valuable time and resources.

KEY FEATURES

- » Eliminates early weed growth by removing competition for nutrients, light, and water.
- » Improves profitability through effective control of early-season watergrass, barnyardgrass, and sprangletop, leading to better financial returns.
- » Has a broad application timeframe, allowing it to be applied to rice both preemergence and post-emergence.
- » Caravel 5G can be used on rice before and after emergence, offering a flexible application window.
