

Active Ingredient: Prothioconazole
Formulation Type: Suspension Concentrate
Group 3

A One-Product Solution to Control Top Five Turf Diseases

Carve™ is a powerful DMI fungicide that provides next-level control of dollar spot, brown patch, anthracnose, gray leaf spot, snow mold and 13 other harmful cool and warm season diseases without thinning turf.

In addition to offering a one-product solution for the toughest diseases, Carve™ also features an excellent turf safety profile, an ultra-low use rate, convenient packaging, and affordability, making it suitable for use across fairways, tees, and greens.

Key Features and Benefits

- Protects against five of the most problematic diseases on golf course turf: dollar spot, brown patch, anthracnose, gray leaf spot, snow mold / Microdochium patch
- In total, controls 13 different cool- and warm season diseases
- Excellent control against many soilborne diseases such as fairy ring, mini-ring, and take-all root rot.
- Excellent cool and warm-season turf safety under any environmental condition with or without PGRs
- Ultra-low, single use rate - 8.5 fl oz/acre
 - * 1 Bottle = 51 fl oz
 - * Treats 6 acres = 1 spray tank (300 gallons)
- Fits well in all golf turf types and in the transition zone where turf mixes are common
- Applied as a foliar spray and fits easily into rotational or tank-mix programs with other registered products

Tackle the toughest 13 harmful cool and warm season diseases across the golf course while providing remarkable turf safety.

Top 5 Most Problematic Diseases

Dollar Spot

Brown Patch

Anthracnose

Grey Leaf Spot

Snow Mold

Carve™ Labeled Diseases and Application Intervals

Disease	Use Rate (fl oz/A)*	Application Interval (days)
Anthracnose	8.5	14 - 21
Brown Patch	8.5	14 - 21
Brown Ring Patch	8.5	14 - 21
Dollar Spot	8.5	14 - 21
Fairy Ring	8.5	14 - 28
