

Active ingredients: Prothioconazole and

Azoxystrobin FRAC code: 11/3

Cortina™ Xtra is a new fungicide that offers reliable control of a broad range of listed diseases. It supplies preventive and curative activity to promote healthy photosynthesis, leading to improved plant growth and yield. It has foliar curative and preventative control of a long-lasting, broad range of disease control, designed for improved plant vigor. Cortina™ Xtra is excellent for use on corn, soybeans, and peanuts as well as wheat, canola, sugarbeets and other labeled crops.

When you want reliable results, count on new Cortina™ Xtra.

Key Benefits:

- Preventative and curative control of yield-robbing diseases leads to improved plant growth and yield
- Promotes healthy photosynthesis and tolerance to stress resulting in deep green, healthy leaves

Product Features:

- Listed diseases are controlled through the inherent characteristics of the active ingredients: SC formulation of Prothioconazole and Azoxystrobin
- Not very soluble in water, but dissolves well in organic solvents; limited water solubility reduces the risk of leaching into groundwater
- Prothioconazole can be absorbed and transported throughout the plant, offering broader protection against fungal diseases
- Volatility is relatively low, minimizing the risk of it evaporating into the air, causing drift effects

Packaging Information:

• 2X 2.5 gal, 270 gal. totes

For Use On:

For control of listed diseases on barley; corn (field, sweet and pop-includes seed production); cucurbits; Crop Group 9 dried shelled pea and bean, except soybean (Subgroup 6C); peanuts; rapeseed Crop Subgroup 20A; rice*; soybean*; and wheat and triticale.
