

## ENARU™ MITICIDE/INSECTICIDE

### Formulation: Suspension Concentrate

Are mites and other crop pests getting out of control? Get control, long-term, with Enaru™, a Western market contact miticide and insecticide with broad spectrum activity, that controls mites and other pests including mealybug, leafhopper, and Asian citrus psyllid. Equivalent to FujiMite®, Enaru's long-lasting control is achieved through excellent knockdown, fast oviposition prevention, and contact ovicidal activity, and is active on all developmental stages of mites, providing ovicidal activity on eggs. Integrated Pest Management (IPM) compatible, Enaru is an excellent choice for resistance management.

Suspension Concentrate; 2.5 gallon jug

Mites

Mealybugs

Leafhopper

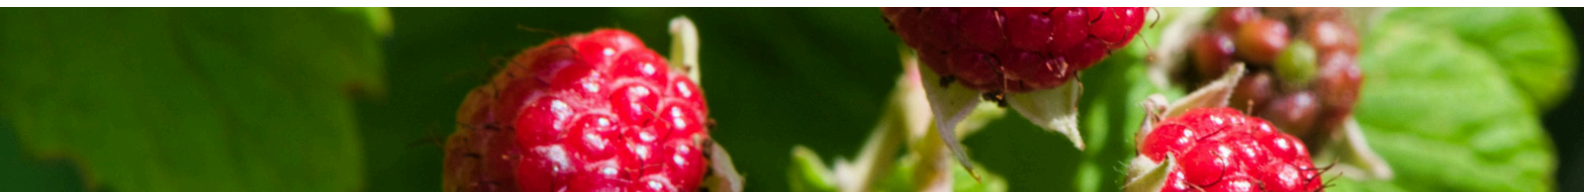

Asian Citrus Psyllid
