

SIPCAM AGRO USA - STILO PSR TANK MIX ADDITIVE

NO RISK GUARANTEE PROGRAM - CORN/SOYBEANS

Sipcam Agro USA is so confident that Stilo PSR will mitigate your corn & soybean crop loss due to abiotic & chemical stressors, that we're putting our money where our mouth is. We're offering a No-Risk Guarantee program for our customers. Stilo PSR is a low use rate, highly compatible tank mix additive that doesn't cost an arm & leg to access. Growers who enroll in this program are assured to get a payback on the investment of Stilo PSR*.

WHAT DO YOU HAVE TO LOSE WHEN PLAYING WITH HOUSE MONEY?

STILO PSR APPLICATION RECOMMENDATIONS:

Tank Mix	Growth Stage	Application Method	StiloPSR Rate
Post Herbicide	V2-V6 - CORN V2-V8 - SOYBEANS	Ground	5oz / Acre
Fungicide	VT - CORN R1-R3 - SOYBEANS	Ground / Air	5oz / Acre

- Apply fungicide/Stilo PSR in a minimum of 10 gals/acre total volume by ground or 2 gals/acre by air
 - Best results have been shown in mid to late POST applications and early fungicide timings
-

PROGRAM QUALIFICATIONS:

Buy and apply 5oz/acre of Stilo PSR this crop season. Applications of Stilo PSR must be made by August 1, 2026 and in accordance with labeled directions.

Treat at least 64 acres of each field with Stilo PSR for yield comparison purposes. Utilizing year-end yield monitor data, determine if the average yield of the treated acres is greater than the average yield on the grower standard program acres. Stilo PSR is guaranteed to outperform the UTC corn acre by at least 1.3 bushels per acre and the UTC soybean acre by 1/2 bushel per acre. If the cost of StiloPSR per acre is not recovered in yield increase, the difference in StiloPSR purchase price and yield gain value will be refunded up to \$5.25 per acre.

CRITICAL DATES:

- July 31, 2026: Grower must submit name, contact info, proof of purchase and field trial acres breakdown.
- Dec 15, 2026: Growers must submit yield maps for treated/untreated field results with treated/untreated boundaries. Yield will be calculated based on the average for all acres within each treatment zone.
- Jan 31, 2027: Sipcam Agro USA remittance of qualified refunds.

END USER SUBMISSIONS:

Go to <https://forms.gle/cboa7QR2YuWhzWbP6> for program enrollment, and <https://forms.gle/d2pFPzwcQDC6pB2UA> for year end yield map submissions.

*Treated and untreated acres shall be harvested within a minimum of 24hrs of each other. The untreated check area can not have additional biostimulant, foliar nutritional sprays, or microbial products that are not also on the Stilo treated side of the field. All agronomic factors must be the same in both treated and untreated acres. Claims for reimbursement up to the full purchase price of Stilo PSR must be made by Dec 15, 2026 via the web portal address above. Sipcam Agro USA will not reimburse for yield reductions related to climatic factors such as flooding, hail, wind, drought, fire, extenuating soil conditions, ie: difference in soil types, tillage, soil compaction, flooding, etc. damage by pests other than corn/soybean insects and or foliar disease or any form of mechanical damage.
