

FULVISOL 90%

CONCENTRATED FULVIC ACID

Total fulvic acid – 90% w/w.

FORMULATION: Fulvisol 90% is a soluble powder containing 90% fulvic acid.

THE PRODUCT

Fulvisol 90% is an 100% water-soluble fulvic acid powder that can be added to fertiliser to assist with plant uptake via its natural complexing properties. It can also act as a carbon source for soil microorganisms when applied to soil and assist with germination.

DIRECTIONS FOR USE

- This product can be blended with a range of granular or liquid fertilisers or applied as a concentrate.
- This product is also available as a liquid concentrate. Contact Sipcam for more details.

- When tank-mixing, add product to the solution after all other products (including most of the water) have been added and incorporated.
- If local experience of successful use is unavailable, conduct a jar test before widespread use. Do not continue with application if any issues are observed.
- Do not apply close to harvest, as fruit staining can occur.
- Do not apply by foliar application to stone fruit.
- Do not apply by foliar application to flowers or fruit of any crop.

APPLICATION METHOD	RATE	COMMENTS
Blending with granular fertiliser	Blend 1% Fulvisol 90% with granular fertiliser	Fulvisol can be blended as a solid or solubilised and sprayed on as a liquid concentrate.
Foliar (all crops)	100 to 500 g per 100 L water	Add last to tank-mixes. Check compatibility before adding to crop protection products. Do not apply close to harvest, as fruit staining is possible.
Fertigation (all crops)	0.3 to 1 kg/ha	Apply through fertigation system.
Turf establishment	1 kg/ha	Apply immediately after planting with started fertiliser. Can also be blended with seed at a rate of 50 g/100 kg of seed.
Turf maintenance	Apply 0.2 kg per 100 L to a rate of 0.5 to 1 kg/ha	Apply via boom or fertigation system.

COMPATIBILITY

Compatible with most common fertilisers and crop protection products. It is recommended to conduct a jar test before mixing.

SAFETY DATA SHEET
