

Zinc

HIGH SULFATE / HUMATE FORMULATION

THE PRODUCT

- **Humisol Zinc** is a zinc nutrition deficiency corrector specifically designed for furrow injection. It can be used in a preventive program at or pre-seeding. It is an ideal partner product with fungicides and UAN in furrow injection systems.

DIRECTIONS FOR USE

- Product should be used for furrow injection. Inject 2 cm below the seed. Where local experience of successful use is not available, we recommend a small scale jar test and test application prior to wide spread use. If any issues are observed do not continue with the application.
- It is recommended to add product to the tank mix after all other products have been mixed well in the tank, including most of the water.
- Do not apply by foliar application to stone fruit.
- Do not apply by foliar application to flowers or fruit of any crop.

COMPATIBILITY

Compatible with most common fertilisers and crop protection products. It is recommended to perform a jar test before mixing. Do not use with amine based products. Do not apply **Humisol Zinc** with copper fungicides by foliar application on all crops.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131 126.

SAFETY DATA SHEET

For further information, refer to the Safety Data Sheet (SDS) which is available from the supplier or from our web site, www.sipcam.com.au

Total zinc (Zn) content of 145 g/L

FORMULATION: A zinc humate solution specifically designed for furrow injection to improve nutrient uptake, emergence and early vigour.

CROPS	RATE	COMMENTS
BROADACRE CROPS	Furrow Injection 4 – 8 L/ha	Apply
	Soil Drench 5 – 12 L/ha	Furrow Injection apply 2cm below seed depth Soil Drench apply pre-seeding
