

SIPCAM AGRO USA UNVEILS CARVE™ XTRA: THE ULTIMATE FUNGICIDE FOR GOLF COURSE TURF HEALTH

Dual-action technology delivers broad-spectrum disease control and resistance management—helping Golf Superintendents keep greens pristine and playable.

DURHAM, NC (December 3, 2025) – **Sipcam Agro USA** proudly announces the launch of **Carve™ Xtra**, a next-generation turf fungicide engineered to meet the rigorous demands of golf course disease management. Developed with golf superintendents and turf managers in mind, Carve™ Xtra delivers **broad-spectrum control, preventive and curative activity, and systemic protection**—all in one powerful solution.

Golf course turf faces relentless pressure from diseases like dollar spot, brown patch, anthracnose and fairy ring. Carve™ Xtra combines **azoxystrobin** and **prothioconazole**—two proven active ingredients with complementary modes of action—to provide unmatched disease control and resistance management. This dual-active formulation ensures turf stays healthy and playable, even under high-stress conditions.

Key Benefits for Superintendents:

- **Broad-Spectrum Protection:** Controls 13 major turf diseases, including summer stress pathogens
- **Resistance Management:** Dual modes of action reduce the risk of fungicide resistance
- **Enhanced Turf Quality:** Improves root development, color retention, shade tolerance, and water use efficiency
- **Versatile Application:** Fits seamlessly into rotational and tank-mix programs for all golf turf types

“Golf course superintendents need solutions that work, and offer a great ROI,” said Dave Feist, Senior Director of Marketing at Sipcam Agro USA. “Carve™ Xtra is designed to deliver consistent, reliable performance while supporting long-term turf health.”

Learn more about Carve™ Xtra!

Join us for **expert consultations** to find out how Carve™ Xtra can elevate your turf management program. We'll be at these upcoming industry events:

- **SFMA Annual Conference** – Jan 21–22, Fort Worth, TX
- **GCSAA Conference & Trade Show** – Jan 31–Feb 5, Orlando, FL
- **New England Regional Turfgrass Conference** – Mar 3–5, Providence, RI

Carve™ Xtra is packaged in **4 x 1-gallon containers per case** and is available exclusively for golf course turf applications. For complete application instructions, always read and follow the product label. Carve™ Xtra will be available in early 2026 through authorized Sipcam Agro USA distributors.
